

FOR IMMEDIATE RELEASE

**IMPROVEMENTS TO 5700/5800 SERIES DOUBLE HUNG WINDOWS
INCLUDE NEW LOCK & KEEPER AND NEW DEDICATED HEAD**

April 1, 2007- In order to comply with recent changes to the building codes enacted by IRC2006, Seven D Industries, LP has implemented some changes to Series 5700-5800 new construction double hung windows.

Effective April 1, 2007, all Series 5700 double hung windows will be manufactured with a newly developed head design. This new design, the Dedicated Head, will create 5.7 square feet of ventilating area for a “3046” (code size) window (3046 dimensions = 37^{5/8}” x 57”). Thus meeting clear opening requirements when windows are used above the ground floor. The Dedicated Head will also provide 10.9 square feet of daylight area for a “3046” window. These specifications meet the minimum ventilation and daylight requirements for a 143 sq. feet room .

The series 5700 Double Hung lock and keeper is being replaced with a new low profile lock and keeper. This attractive, new lock provides the same hard working performance and security as the previous lock. The improvements are in it’s sleek, modern, low profile design. It’s height is approximately 1/4 inch shorter than the previous lock. This adjustment, when paired with the Dedicated Head, results in helping to meet the clear opening requirements for “3046” windows.
