

**FOR IMMEDIATE RELEASE**

## **SEVEN D INDUSTRIES OFFERS NEW 5700 BRICKMOULD NEW CONSTRUCTION WINDOWS SERIES**

**November 15, 2006** - Seven D Industries, LP is expanding its product mix with the addition of Series 5700 brickmould windows. The company has added brickmould windows in response to its customers' growing interest in the traditional, elegant look of a brickmould trimmed window. The new windows are available in two new construction product styles: single and double hung. To avoid any additional cost or labor Seven D Industries' brickmould trim is ingeniously built as part of the sturdy master frame. Series 5700 is available in white (standard), tan or clay vinyl.

Series 5700 is perfect for multiple units. Its innovative design features continuous head & sill to eliminate the view of separate vertical mullions. Continuous nail fin is another standard feature on Series 5700. This creates full width flashing eliminating potential water infiltration. These features also increase the structural integrity of multiple units.

When purchasing a Series 5700 window, consumers can expect the same great competitive standards that comes with all Seven D Industries vinyl windows, patio doors and architectural shapes such as durability and energy efficiency.

**Durability** - Series 5700 features sturdy, all-welded vinyl frames with multi-chambered extrusions to provide strength. To ensure that the windows never fade, warp or become brittle all Seven D windows are made with 100% pure virgin vinyl.

**Energy Efficiency** - Features such as dual fin weatherstripping, fusion welded sashes and Low E/Argon filled glass units showcase that Series 5700 windows are designed with Energy Efficiency as a top priority.

Durable, energy efficient Seven D Industries new construction windows paired with a unique, brickmould look make a perfect combination for any new home trying to achieve a warm, classic appeal.
